Algorithms \& Models of Computation

## CS/ECE 374, Fall 2020

19.3.1

Exercise: Scheduling Jobs to Minimize Weighted Average Waiting Time

## Exercise: A Weighted Version

- $n$ jobs $J_{1}, J_{2}, \ldots, J_{n}$. $\boldsymbol{J}_{\boldsymbol{i}}$ has non-negative processing time $\boldsymbol{p}_{\boldsymbol{i}}$ and a non-negative weight $w_{i}$
- One server/machine/person available to process jobs.
- Schedule/order the jobs to minimize total or average waiting time
- Waiting time of $\boldsymbol{J}_{\boldsymbol{j}}$ in schedule $\boldsymbol{\sigma}$ : sum of processing times of all jobs scheduled before $J_{i}$
- Goal: minimize total weighted waiting time.
- Formally, compute a permutation $\pi$ that minimizes $\sum_{i=1}^{n}\left(\sum_{j=1}^{i-1} p_{\pi(j)}\right) w_{\pi(i)}$.

|  | $J_{1}$ | $J_{2}$ | $J_{3}$ | $J_{4}$ | $J_{5}$ | $J_{6}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| time | 3 | 4 | 1 | 8 | 2 | 6 |
| weight | 10 | 5 | 2 | 100 | 1 | 1 |

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:
Job 1 first Job 2 first

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
|  |  |  |

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$ dividing by $\boldsymbol{p}_{1} \boldsymbol{p}_{2} \ldots$

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$
dividing by $\boldsymbol{p}_{1} \boldsymbol{p}_{2} \ldots$
equivalent to comparing $\boldsymbol{w}_{2} / \boldsymbol{p}_{2} \stackrel{?}{=} \boldsymbol{w}_{1} / \boldsymbol{p}_{1}$
$\omega_{i}=w_{i} / \boldsymbol{p}_{\boldsymbol{i}}$ : Price per processing unit in dollars

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$
dividing by $\boldsymbol{p}_{1} \boldsymbol{p}_{2} \ldots$
equivalent to comparing $\boldsymbol{w}_{2} / \boldsymbol{p}_{2} \stackrel{?}{=} \boldsymbol{w}_{1} / \boldsymbol{p}_{1}$
$\omega_{i}=w_{i} / \boldsymbol{p}_{\boldsymbol{i}}$ : Price per processing unit in dollars

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$
dividing by $\boldsymbol{p}_{1} \boldsymbol{p}_{2} \ldots$
equivalent to comparing $\boldsymbol{w}_{2} / \boldsymbol{p}_{2} \stackrel{?}{=} \boldsymbol{w}_{1} / \boldsymbol{p}_{1}$
$\omega_{i}=\boldsymbol{w}_{\boldsymbol{i}} / \boldsymbol{p}_{\boldsymbol{i}}$ : Price per processing unit in dollars
Sort jobs in decreasing value of $\boldsymbol{\omega}_{\boldsymbol{i}}$. Schedule jobs by this value.

## Exercise: A Weighted Version

Consider two jobs $\boldsymbol{p}_{1}, \boldsymbol{p}_{2}$ of weight $\boldsymbol{w}_{1}$ and $\boldsymbol{w}_{2}$. We have two possibilities:

|  | Job 1 first | Job 2 first |
| :---: | :---: | :---: |
| Pricing | $0 \cdot \boldsymbol{w}_{1}+\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $0 \boldsymbol{w}_{2}+\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |
| Equivalent to | $\boldsymbol{p}_{1} \boldsymbol{w}_{2}$ | $\boldsymbol{p}_{2} \boldsymbol{w}_{1}$ |

need to compare $\boldsymbol{p}_{1} \boldsymbol{w}_{2} \stackrel{?}{=} \boldsymbol{p}_{2} \boldsymbol{w}_{1}$
dividing by $\boldsymbol{p}_{1} \boldsymbol{p}_{2} \ldots$
equivalent to comparing $\boldsymbol{w}_{2} / \boldsymbol{p}_{2} \stackrel{?}{=} \boldsymbol{w}_{1} / \boldsymbol{p}_{1}$
$\omega_{i}=\boldsymbol{w}_{\boldsymbol{i}} / \boldsymbol{p}_{\boldsymbol{i}}$ : Price per processing unit in dollars
Sort jobs in decreasing value of $\boldsymbol{\omega}_{\boldsymbol{i}}$. Schedule jobs by this value.
Correctness proof: Same as the unweighted case - if there is an inversion, then by the argument above, flip these jobs, and get a better schedule.

## THE END

(for now)
