

Homework 6

Due by Class Time Tuesday, Nov. 17

Description and Instructions

For this homework assignment you will be using the ACM Digital Library to find one research paper you find interesting and that presents both qualitative and quantitative data to help communicate the research findings. The paper should come from any years' CHI conference and should be full-length (approximately 10-13 pages) and not in the Extended Abstracts. This means that it will come from the Proceedings of the SIGCHI Conference on Human Factors in Computing Systems and not the Proceedings of the CHI Conference Extended Abstracts on Human Factors in Computing Systems.

To access appropriate papers copy and paste the following link through a campus (UI password approved) account:

http://dl.acm.org/results.cfm?query=a&filtered=acmPubGroups%2EacmPubGroup%3DProceeding~acmdlPublisherName%2Eraw%3DACM~allPubGroups%2EallPubGroup%3DProceeding~series%2EseriesAbbr%3DCHI~resources%2Eft%2EresourceFormat=PDF&within=owners%2Eowner%3DHOSTED&dte=&bfr=&srt=_score

- 1) Explain how the paper you selected uses a combination of qualitative and quantitative data to help communicate its findings
- 2) Provide an overall narrative evaluation of the paper from the perspective of our textbook chapter 6 "Reporting."

You should cite each paper and quote (cut and paste is fine for graphical and pictorial items) relevant material to make your points. Submit your assignment as a PDF.
