Nash equilibrium

One found:

$$\frac{7+9u}{10} \geq u$$

$$7 \geq u$$

$$\frac{7+u9}{10} \geq 1$$

$$9u \geq 3 \quad \boxed{u \geq \frac{3}{9}}$$

Two found

$$\frac{7+19u}{20} \geq u$$

$$\frac{7+19u}{20} \geq 1$$

$$19u \geq 13$$

$$u \geq \frac{13}{19}$$
