MSE 598 Guide to 4CeeD

https://learn.4ceed.illinois.edu/

## Preparing to Use 4CeeD for MSE598

1) Creating an Account/Logging In

4CeeD for classes, such as MSE 598, is located at https://learn.4ceed.illinois.edu/. The sign-up and log-in process is the same for both. Please create an account before the first lecture. Note, that 4CeeD can sometimes only be accessed on an *IllinoisNet* connected network for security purposes. Please use a Cisco VPN [1] to connect to the school network if you are having troubles connecting.

[1] https://techservices.illinois.edu/services/virtual-private-networking-vpn/download-and-set-up-the-vpn-client

    a.   From the homepage, click **Login** on the upper right corner

    b.   Click the **CI Logon** button to use your Illinois account to access 4CeeD
- Note: Email account creation and sign-in is depreciated and will be removed in the future so please use the **CI Logon** option
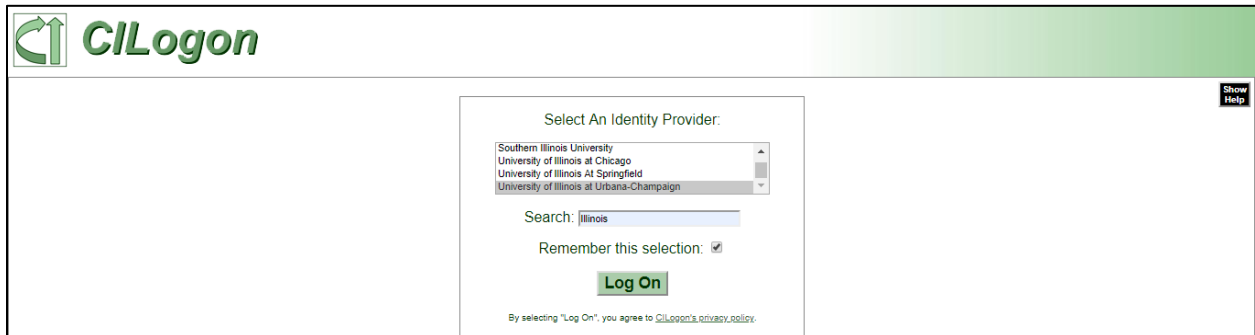

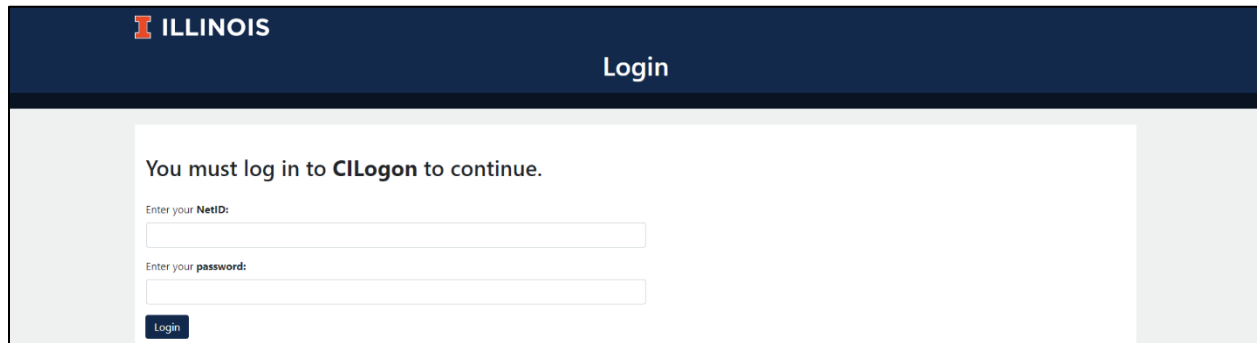

c. From the CI Logon page, find "University of Illinois at Urbana-Champaign" listing under *Identify Provider* and click **Log On**

- You may want to check **Remember this selection** to speed up the log-in in the future

d. Log in to your Illinois account as normal

e. Congrats! You now have a 4CeeD account

- Note: Your account only exists on the class instance of 4CeeD (https://learn.4ceed.illinois.edu/); this process will need to be repeated if you wish to have an account on the general use 4CeeD (https://4ceed.illinois.edu/).

To log-in to 4CeeD in the future, the same process is followed.

2) Preparing for the first 4CeeD Lecture Series

Feel free to prepare some data files from your research or personal projects. You can try storing them in 4CeeD during one of our breakout sessions.
