

PHYS100: To-do list in week 1

Hi, everyone! Welcome to PHYS100.
Here are some to-do items before your first class.

Check out the course website, which has a ton of information
<https://courses.physics.illinois.edu/phys100/fa2023/>

Your first discussion section (Tues, Wed, or Thurs)

1. You **do** have a discussion section to attend during the first week of class.
Please bring a laptop/tablet to access online pdfs.

Before your first lecture (Fri)

1. Complete the pre-lectures and checkpoint for “1. Kinematics Definitions” on smartPhysics (you can get to smartPhysics from the course website).
2. Purchase an iClicker (I recommend a used one), register it, and bring it to lecture. (see “iClicker Info” page on the course website for more details.)
3. Ask your questions on the class Piazza Message board (see Piazza link on course website)

Questions?

Post any questions on the course piazza message board under the “course logistics” channel. If you post your question publicly, it’s bound to help someone else too!
(see Piazza link on course website)
