

Homework Assignment #12, Scientific Poster—FINAL VERSION

For this assignment, you will prepare a final version of your poster, based on the feedback you received for Homework #11.

Your final version must be visually engaging, with a good balance of text and images, presented in “landscape” layout, 36-in high by 48-in wide. Make sure your figures and text are big enough to be read from a distance, and each segment of the poster has a good balance of words and pictures.

Consult the [evaluation criteria](#) when revising and refining your poster.

Due: **Wednesday, April 23, 9:00 p.m.** Upload your poster in one file to my.physics. Failure to submit your poster by the deadline may mean your poster cannot be printed in time for you to present it for Homework #13 on May 2, resulting in a loss of an additional 200 points.

Total—100 points
