

### Homework Assignment #3, Title and Abstract

---

Use the same paper that you chose for last week's assignment. This homework consists of two parts:

1. Analyze the title of the paper, using the criteria presented in the January 27 class lecture. Is the paper's title concise and descriptive? Will it capture a busy reader's attention and interest? **Write** a one-paragraph evaluation of the title and either emphasize what is good about the title or suggest how it might be improved.
2. Next, **write** an appropriate abstract for the paper, following the lessons from the February 3 lecture (remember MMRC!).

If you are having any trouble understanding the physics concepts presented in the paper, schedule an appointment with [Minhui Zhu](#) (*Do not* wait until Thursday at midnight to start the assignment.)

Be sure to clearly indicate on your submission which paper you are writing about.

Due: **Friday, February 10, 9:00 p.m.** Upload your completed assignment to the my.physics portal.

Late assignments may be submitted until 8:59 p.m. on Sunday, February 12. Assignments submitted after the deadline will have points deducted and will be ineligible for rewrite points.

Total—100 points
