

Phys 595 Oral Presentation Evaluation

Presenter _____

The Content

- How well did you follow the flow of information? Was the presentation clear? Were there any disruptions that caused you to lose focus?

- What was the main scientific goal of the research project (not the specifics of the task, but the main goal)?

- Summarize the central activity or method used in the project.

- Summarize the results or key conclusions of the project.

The Presentation

- Were the slides clear, readable, too dense, too thin, boring?

- Did the speakers talk too quickly, just right, too slowly? Did the speakers have any distracting mannerisms?

- Any other particular strengths or weaknesses?
