Discussion: |  | Thursday | Friday | 9 | 10 | 11 | 12 | 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

1. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every dragon $d$, if $d$ is green, then $d$ is not large or $d$ is fat.
2. (5 points) State the negation of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For any student $s$, if $s$ rides a bicycle, then $s$ wears a helmet or $s$ has no fear of death.
3. (5 points) Solve $\frac{3}{x}+m=\frac{3}{p}$ for $x$, expressing your answer as a single fraction. Simplify your answer and show your work.

## Discussion: $\begin{array}{llllllllllll} & \text { Thursday } & \text { Friday } & 9 & 10 & 11 & 12 & 1 & 2 & 3 & 4 & 5 \\ 6\end{array}$

1. (5 points) Give a truth table for the following expression and (using your truth table or other means) find a simpler expression equivalent to it.

$$
(p \wedge q) \vee q \equiv
$$

| p | q | $p \wedge q$ | $(p \wedge q) \vee q$ |
| :---: | :---: | :---: | :---: |
| T | T |  |  |
| T | F |  |  |
| F | T |  |  |
| F | F |  |  |

2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every cat $c$, if $c$ is not fierce or $c$ wears a collar, then $c$ is a pet.
3. ( 5 points) Solve $16 p^{2}-81=0$ for $p$. Simplify your answer and show your work.

Discussion: |  | Thursday | Friday | 9 | 10 | 11 | 12 | 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

1. (5 points) State the negation of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every dragon $d$, if $d$ is not large, then $d$ is green or $d$ not hungry.
2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every tree $t$, if $t$ is in Illinois and $t$ is not hardy, then $t$ is indoors.
3. (5 points) Suppose that $k$ is a positive integer, $x$ is a positive real number, and $\frac{1}{k}=x+\frac{1}{6}$. What are the possible values for $k$ ? (Hint: $k$ is an INTEGER.) Briefly explain or show work.

Discussion: |  | Thursday | Friday | 9 | 10 | 11 | 12 | 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

1. (5 points) Show that the following two expressions are not logically equivalent, by giving specific values of $p, q$ for which they produce different values.
$p \rightarrow(q \rightarrow p)$
$(p \rightarrow q) \rightarrow p$
2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every car $c$, if $c$ is a Tesla, then $c$ is new or $c$ is not fast.
3. (5 points) Suppose that $k$ is a positive integer, $x$ is a positive real number, and $\frac{1}{k}+x=\frac{1}{6}$. What are the possible values for $k$ ? (Hint: $k$ is an INTEGER.) Briefly explain or show work.

Discussion: $\left.\begin{array}{llllllllllll} & \text { Thursday } & \text { Friday } & 9 & 10 & 11 & 12 & 1 & 2 & 3 & 4 & 5\end{array}\right) 6$

1. (5 points) State the negation of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every tree $t$, if $t$ grows in Canada, then $t$ is not tall or $t$ is a conifer.
2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every garbage can $c$, if $c$ was supplied by the city, then $c$ is small or $c$ has wheels.
3. (5 points) Solve $3 x+2 m=\frac{w}{y}$ for $x$, expressing your answer as a single fraction. Simplify your answer and show your work.

1. (5 points) Give a truth table for the following expression and (using your truth table or other means) find a simpler expression equivalent to it.

$$
(p \rightarrow q) \wedge(p \rightarrow \neg q) \equiv
$$

| p | q | $p \rightarrow q$ | $p \rightarrow \neg q$ | $(p \rightarrow q) \wedge(p \rightarrow \neg q)$ |
| :---: | :---: | :---: | :---: | :---: |
| T | T |  |  |  |
| T | F |  |  |  |
| F | T |  |  |  |
| F | F |  |  |  |

2. (5 points) State the negation of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every book $b$, if $b$ is blue or $b$ is not heavy, then $b$ is not a math book.
3. (5 points) Solve $\frac{2 m^{2}-m-6}{m-2}=9$ for $m$. (Assume $m \neq 2$.)

Discussion: |  | Thursday | Friday | 9 | 10 | 11 | 12 | 1 | 2 | 3 | 4 | 5 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

1. (5 points) State the negation of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

There is a soup $s$ such that $s$ is tasty and $s$ does not contain meat.
2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For any bear $b$, if $b$ is blue and $b$ talks, then $b$ is fuzzy.
3. (5 points) Suppose that $G$ and $H$ are functions whose inputs and outputs are real numbers, defined by $G(x)=x-2$ and $H(x)=\sqrt{2 x+1}$, where the square root function returns only the positive root. Compute the value of $H(G(G(8)))$, showing your work.

## Discussion: $\begin{array}{llllllllllll} & \text { Thursday } & \text { Friday } & 9 & 10 & 11 & 12 & 1 & 2 & 3 & 4 & 5 \\ 6\end{array}$

1. (5 points) Show that the following two expressions are not logically equivalent, by giving specific values of $p, q$, and $r$ for which they produce different values.
$(p \rightarrow q) \wedge r$
$p \rightarrow(q \wedge r)$
2. (5 points) State the contrapositive of the following claim, moving all negations (e.g. "not") so that they are on individual predicates.

For every jedi $j$, if $j$ has a light saber and $j$ is not sick, then $j$ can defeat the Dark Side.
3. (5 points) Suppose that $x$ is an integer and $x^{2}+3 x-18<0$. What are the possible values of $x$ ? Show your work.
