

Progress Demo Semester: _____

Team No. _____ Reviewer: _____

Most subsystems should be controlled by the microprocessor on a PCB. A power supply and regulator should be connected or available. Test data should be displayed on a PC or other display. The project team should be able to describe the project status and remaining tasks.

Full Credit: Demo should show significant progress since the first breadboard demo (10 points).

Status of Major Project Components

Power Supply

PCB

Subsystems
