

Table of Contents

1. Introduction.....	1
2. Problem Statement.....	3
3. Objectives	4
4. Review of Thermoforming Process	5
5. Analysis of Current Mold Cavity Design	11
5.1 Identifying the Target of Modification	11
5.2 Theoretical Flow Analysis	12
5.3 Computational Fluid Dynamics	17
5.4 Experimentation.....	25
5.4.1 Physical Experimental Setup	27
5.4.1.1 Air Pressure Source.....	27
5.4.1.2 Flowmeter Selection	28
5.4.1.3 Black Box.....	29
5.4.2 Experimental Procedure.....	30
6. Design Alterations	34
6.1 General Design Changes.....	34
6.1.1 Forming Insert.....	35
6.1.2 Engraving Insert.....	39
6.1.3 Stacking Ring.....	40
6.2 Prototype Testing	42
7. Economic Analysis	48
8. Conclusions.....	53
8.1 Further Considerations.....	54
9. Recommendations.....	55
9.1 Primary Recommendations.....	55
9.2 Secondary Recommendations.....	55
10. References.....	57
Appendix A – AutoCAD Drawings of Design Modifications	
A.1 Test P-16 Forming Insert – DWG. 400669-UIUC.....	A-1
A.2 Conical Drill Bit – DWG. Con Drill A	A-5
A.3 Test P-16 Engraving Insert – DWG. 47673-UIUC.....	A-6
A.4 Test P-16 Stacking Ring – DWG. 400275-UIUC.....	A-8
