

Physics 598 PEN – Spring 2020

Assignment #5: Research Presentation on Your Research Topic

Prepare a roughly 25-minute PowerPoint presentation that describes your selected research topic. Your research presentation should include all the elements of a good scientific presentation: (i) an introduction that motivates, and provides suitable background for, your research topic; (ii) a description of the methods and procedures used in your research topic; (iii) a discussion and analysis of the key results associated with your topic; and (iv) a summary of the key results and conclusions for your project. If your research topic involves proposed work (e.g., for a preliminary exam), then description of your results can include any preliminary results and/or proposed research.

In class presentations will be given on **April 10**, **April 17**, and **April 24**.
